Dry eye relief in two minutes.

FDA-cleared treatment for evaporative Dry Eye due to MGD—designed for speed, simplicity, and consistent results.

✓ Quick, 2-minute treatment

✗ No downtime

✓ FDA-cleared

Yet most patients only receive drops—which treat symptoms, not the source.

01 A critical oil layer normally prevents your tears from evaporating.

02 Blocked eyelid glands cause that oil layer to fail—leaving eyes exposed.

03 Tixel i® rejuvenates these glands, restoring natural tear function.

Regulatory

Tixel is an FDA-cleared device for evaporative Dry Eye resulting from MGD. Individual results may vary. | 2026 Tixel®, Novoxel®, and TMA®. All rights reserved.

Patient Brochure Tixel VIS LFL-0001670.1

30 Million Americans Affected by Dry Eye.

In a world of constant screens and environmental stressors, dry eye isn't just about "dryness" - it's a cycle of discomfort that disrupts daily life.

Recognize the Signs:

The Fatigue

Eye strain and heavy eyelids after screens, work, or driving.

The Distraction

Persistent itching, stinging, or redness that breaks your focus.

The Paradox

Unexpected tearing as your eyes struggle to stay protected.

If you're relying on eye drops multiple times a day, that's not relief - that's a band-aid."

How It Works

Efficiency Meets Efficacy.

Tixel for Dry Eye trades long, invasive procedures for a breakthrough 2-minute treatment using proprietary Thermo-Mechanical Action (TMA®).

The Advantage

Speed

Both eyes treated while you sit comfortably in the chair in just 2 minutes.

No Radiation

TMA uses heat and pressure only-no lasers or light energy.

Zero Eye Contact

The handpiece never touches the surface of your eye.

No Downtime

Optional anesthesia. Return to your full day immediately.

What to Expect

The Path to Clarity

The Session

Gentle heat pulses through a titanium-coated tip "unlock" your eyelid glands in **just 2 min per eye.**

The Plan

Just 3 short visits over 1 month

> 6mo

Clinically demonstrated lasting relief through full 6-month follow-up.
